Wi-Fi 7 Seamless Communication Solution

- **Reliable Connectivity in High-Density Environments**

Ensures seamless voice and data transmission even in crowded transit hubs with massive concurrent connections.

- **Advanced Anti-Interference Design**

Mitigates signal disruption caused by high ceilings and reflective metal surfaces, delivering stable, high-quality coverage.

- **Low-Latency Voice Transmission**

Optimized Wi-Fi prioritization ensures real-time delivery of voice and emergency broadcasts without interruption.

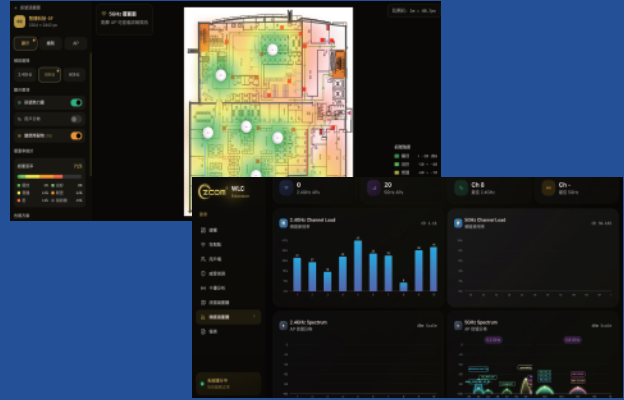

- **Seamless Roaming Performance**

Enables fast handover for uninterrupted connectivity during movement across areas, ensuring every command is delivered reliably.

Standalone or Centrally Managed via Z-COM WLC .NEW Platform

NEW is Z-COM's next-generation unified management platform —Network Extension with Wire and Wireless —representing our full commitment to converged wired and wireless network operations.

Core Principles of the NEW Platform

One interface. All network resources:

- Wired infrastructure, wireless Access Points, network control, and energy systems —all visible in a single screen.
- Operators work from one unified console, dramatically reducing management complexity.

Single Unified Interface (Unified UI)
Wired + Wireless + AI Applications —one-click management

Native Wi-Fi Support
All ZCOM APs manageable —zero-barrier upgrades

Flexible branding & customization:

- Licensed white-label deployment available for partners and enterprise customers.

Modular Licensing
Dynamically activate modules as your needs grow

Tri-Band Wireless Performance

Security & Management

- WPA3 / 802.1X
- Rogue AP Detection
- Web UI / SSH / CLI

Physical Design

- Internal antennas x 6
- Ceiling / Wall Mount
- Size 200 x 200 x 37.7 mm
